We make your systems come to life

JD Enterprises is a unique firm. Unlike the traditional IT consultancy company we don't focus on selling you on software for your business. Our focus is making the software fully functional for your organization. We utilize a business process analysis to research and identify your existing business model and then customize your software applications to match your organizations unique business processes.

Automation & Integration Combined

Even though there is a need for constant checks and balances in your business, the purpose of incorporating software into your business processes is to eliminate redundancies, automate processes and make each employee more efficient. We understand this need but we also understand how to properly automate your business processes so that all areas of your organization (from sales, to inventory management, to shipping, and even forecast modeling) are all in sync with each other.

We provide controls which allow your systems to speak to each other and deliver important information. If you have a sales quote that is approved we can ensure that your delivery processes are updated immediately and your reports show these updates instantly. The ability to be fully automated and efficient from start to finish gives you the power to focus on growth and enhance your business output and increase your ROI.

We get rid of the clutter and let you focus on what matters

Often times software is cumbersome not because of its intended application but because there are features and processes that come with it that you will never need or use. Having these items in the way slows processes as users attempt to figure out and locate where they are supposed to be and how to use the system.

In order to run your business effectively the ability to adapt to technology is critical and we understand that. Our team can clean up your systems and remove the clutter making your adoption rates easier and processes run faster.

We don't leave you in the dark

Our team of professionals will provide you with not only functional systems for your business but we will train you on them, provide materials to assist you in adopting the technology and provide long term support on any and all customized work that we do for you. This helps to ensure that you can focus on what matters most in your business and we will focus on keeping it running for you.

How can we begin to assist you?

Contact us today and we will schedule a review session to discuss your current needs and assess ways that we can help you. We never require a commitment for this and will be happy to provide you with a range of options for you to decide on.
